SUMMARY

Versatile Software Engineer with hands-on experience in developing and maintaining web-based applications, including admin dashboards, with strong skills in HTML, CSS, and JavaScript. Experienced in bug fixing, testing, and improving system reliability, and capable of translating business requirements into scalable software solutions.

EXPERIENCE

IT Developer
Sari Tirta

02/2025 - 02/2026

- Designed and developed a web-based admin dashboard to manage system data, users, and application workflows efficiently.
- Performed bug fixing by identifying, analyzing, and resolving functional and UI issues to improve system stability and performance.
- Conducted a testing, including functional and user acceptance testing to ensure the web admin operated correctly and met requirements.

Online course
RevoU

10/2024 - 10/2024

- Designed and developed the user interface (UI) and interactivity for a temperature calculator using HTML, CSS, and JavaScript.
- Implemented JavaScript-based interactivity, including event handling for user input and calculation processing.
- Developed JavaScript algorithms for converting temperatures between Celsius and Fahrenheit and implemented input validation to ensure user-entered data is valid.

EDUCATION

Computer Science
Binus University - Undergraduate
GPA 3.40/4.00

08/2022 - Present

CERTIFICATES
